ADVANCED PHYTOCHEMISTRY

Module designation	*Advanced Phytochemistry*
Semester(s) in which the module is taught	*2*
Person responsible for the module	1. Prof. Dr. Achmad Fuad Hafid, MS., Apt **(Course Coordinator)** 2. Prof. Dr. Aty Widyawaruyanti, M.Si, Apt. 3. Suciati, SSi., MPhil., PhD., Apt 4. Tutik Sri Wahyuni, PhD 5. Rr. Retno widyowati, PhD
Language	*Bahasa Indonesia*
Relation to curriculum	*~~Compulsory / elective~~ / specialisation*
Teaching methods	*lecture, discussion, assignment*
Workload (incl. contact hours, self-study hours)	*(Estimated) Total workload:* *Contact hours (structured activities.): 90,67 hours* *Private study including independent learning activites*: *90,67 hours*
Credit points	*2 SCU / 6 ECTS*
Required and recommended prerequisites for joining the module	*NA*

Module objectives/intended learning outcomes	Students are: LO1: Able to realize excellence based on religious morals (excellence with morality), able to work together, and show a responsible attitude to work in their field of expertise independently LO2: Able to internalize the spirit of independence, struggle, and entrepreneurship LO4: Able to develop a pharmaceutical professional performance with analytical acumen in solving pharmaceutical problems and managing research in the pharmaceutical field related to national and global systems and policies, both inter and inter-disciplinary approaches. LO5: Able to access and review information through an Information and Communication Technology (ICT) system, decide on a specific subject of study, maintain the feasibility of implementing research designs, conduct research, analyze data, conclude research results comprehensively, and create strategic issues based on the study that reflect the latest updates in the field of pharmaceutical sciences, and communicate them in the media and scientific forums at the national and international level through an interdisciplinary or multidisciplinary approach in the form of a thesis or other equivalent forms. LO6: Able to make decisions in the context of solving problems related to science and technology development based on analytical or experimental studies through collaboration with colleagues, colleagues in institutions and research communities at both national and international levels and utilizing research results for the benefit of the user and other communities LO7: Able to analyze natural materials to obtain active ingredients and/or pharmaceutical excipients with due observance of nature conservation.
Content	This course discusses the process of biosynthesis of secondary plant metabolites related to plant physiological activities, separating active secondary metabolites, and identifying active ingredients using the latest technology
Exams and assessment formats	*Take-home assigment*
Study and examination requirements	*The final grade in the module is composed of 25% presentation 65% take-home assignments, 10% in-class participation and soft-skills assessment. Students must have a final grade of 70% or higher to pass*
Reading list	1. *Nikolaus H. Fischer, 1991; Modern Phytochemical Methods vol. 25, ISBN: 978-1-4684-9062-6* 2. *Monika Waksmundzka-Hajnos, 2011; High Performance Liquid Chromatography in Phytochemical Analysis, ISBN 978-1-4200-9260-8, CRC Press.* 3. *Alan Crozier, 2006; Plant Secondary Metabolites, ISBN-13: 978-1-4051-2509-3, Blackwell Publishing* 4. *Satyajid D. Sarker, 2006 ; Natural Products Isolation 2nd edition, ISBN 1-58829-447-1, Humana Press Inc.*
