ADVANCED CHROMATOGRAPHY

Module designation	Advanced Chromatography
Semester(s) in which the module is taught	1
Person responsible for the module	1. Prof. Dr.rer.nat. apt. M. Yuwono, MS. (Course Coordinator)
	2. Prof. Dr. apt. Djoko Agus Purwanto, M.Si.
	3. Dr. apt. Riesta Primaharinastiti, M.Si.
Language	Bahasa Indonesia
Relation to curriculum	Compulsory / elective / specialisation
Teaching methods	lecture, discussion, assignment
Workload (incl. contact hours, self-study hours)	(Estimated) Total workload: Contact hours (structured activities.): 90,67 hours Private study including independent learning activites: 90,67 hours
Credit points	2 SCU / 6 ECTS
Required and recommended prerequisites for joining the module	NA

Module objectives/intended	Students are:
Module objectives/intended learning outcomes Content	Students are: LO1: Able to realize excellence based on religious morals (excellence with morality), able to work together, and show a responsible attitude to work in their field of expertise independently LO2: Able to internalize the spirit of independence, struggle, and entrepreneurship LO4: Able to develop a pharmaceutical professional performance with analytical acumen in solving pharmaceutical problems and managing research in the pharmaceutical field related to national and global systems and policies, both inter and inter-disciplinary approaches. LO5: Able to access and review information through an Information and Communication Technology (ICT) system, decide on a specific subject of study, maintain the feasibility of implementing research designs, conduct research, analyze data, conclude research results comprehensively, and create strategic issues based on the study that reflect the latest updates in the field of pharmaceutical sciences, and communicate them in the media and scientific forums at the national and international level through an interdisciplinary or multidisciplinary approach in the form of a thesis or other equivalent forms. LO6: Able to make decisions in the context of solving problems related to science and technology development based on analytical or experimental studies through collaboration with colleagues, colleagues in institutions and research communities at both national and international levels and utilizing research results for the benefit of the user and other communities. LO11: Able to develop systems for evaluating the bioavailability of drugs in the body, pharmaceutical products circulation permits, and their in-vitro and in-vivo evaluations with specific delivery systems with appropriate analytical methods. LO12: Able to develop analytical methods to ensure the quality of drugs, cosmetics, foods, and beverages. LO15: Able to plan and organize concepts and procedures for quality assurance and recommendations on pharmaceutical products, which include drugs, cosmetics, food
Exams and assessment formats	Final exam or take-home written assignments
Study and examination requirements	the final grade in the module is composed of 25% presentation 65% take-home assignments, 10% in-class participation and soft-skills assessment. Students must have a final grade of 70% or higher to pass

Reading list 1. S. Ahuja and M.W. Dong, 2005. Handbook of Pharmaceutical Analysis by HPLC, Elsevier, Amsterdam. 2. N. Grinberg and Rodriguez, 2019, Ewing's Analytical		
Instrumentation Handbook, Fourth Edition, CRC Press, Taylor & Francis Group, New York 3. D. A. Skoog F. J. Holler, Stanley and R. Crouch, 2018, Principles of Instrumental Analysis, Seventh Edition, Cengage Learning, Boston USA. 4. B. N. Pramanik, A. K. G. Stevens, M L. Gross, 2002, Applied Electrospray Mass Spectrometry, Marcel Dekker, New York 5. H. S Traub, M. Schulte and A. S. Morgenstern, 2012, Preparative Chromatography, Wiley-VCH Verlag, Weinheim, Germany	Reading list	 Pharmaceutical Analysis by HPLC, Elsevier, Amsterdam. 2. N.
